Task 1: Mortgage repayment calculator coding challenge (partially completed)

Task 2: Deploy Mortgage repayment calculator (pending)

In task 1, I've implemented JS logic and Updated HTML and CSS to show the result. Then I've made the mortgage calculator responsive for desktop and tablet. By tomorrow I'll make it fully responsive.

Here is link to source code: <https://github.com/Pawandadra/mortgage-repayment-calculator>

I'll also deploy it once it is completed.
